Summary

Results-driven Full-Stack Developer with **3+ years of experience** building scalable, high-performance **web applications** using **React, Angular 17, Node.js, and Next.js**. Proven success in **boosting system performance by 30%**, **reducing delivery timelines by 20%**, and improving **user satisfaction by 40%** through **micro-frontend architectures** and **UX optimization**. Strong collaborator across **DevOps, backend, and design teams** with a track record of delivering **production-ready systems**.

Skills

React.js • Angular • Next.js • React Native • Expo • HTML • CSS • Node.js • Express.js • SCSS • JavaScript • TypeScript • Git • GitHub • Bootstrap • Tailwind CSS • Unit Testing • Algorithms • Data Structures • Peer Code Reviews • Agile Methodology • Object-Oriented Design

Experience

Accenture

Pune, India

Applications Development Analyst

12/2022 - 09/2025

A global professional services company specializing in digital, cloud, and security.

- Initiated and led the development of an **Angular 17** project using **NX CLI/Console**, managing the complete **front-end** and **client communications**, achieving **100% client satisfaction** and **reducing delivery time by 20%**.
- Designed and implemented a **micro frontend** and **multi-repo architecture** with **50+ components**, enhancing **cross-platform functionality**, improving **system performance by 30%**, and minimizing **development delays by 20%**.
- Served as the **primary liaison for client requirements**, working closely with **DevOps** and **backend teams** to ensure **seamless integration**, **timely task execution**, and streamlined team communication.
- Partnered with the **UX team** to **optimize UI/UX**, increasing **user satisfaction by 40%** and achieving a **98% client satisfaction** rate. Delivered responsive designs that **reduced UI-related issues by 40%**.
- Conducted **knowledge transfer (KT)** sessions for **10+ team members**, **boosting team productivity by 25%** through detailed training on functionality, codebase, and UI practices.
- Developed and maintained **secure authentication systems**, enhancing **healthcare data protection by 35%**, and increased unit test **coverage from 60% to 85%**, **reducing bugs by 20%** and **improving software stability**.
- Integrated **RESTful APIs** to enhance frontend-backend communication, resulting in a **25% increase** in application performance and **improved system scalability**.
- Mentored junior developers and reviewed PRs regularly, improving code quality and accelerating onboarding.

Satyam Technologies,

Nagpur, India

Java Programmer

December 2021 – March 2022

An IT services company specializing in software development and testing.

- Automated web applications** using **Selenium**, streamlining **data extraction workflows** and exporting results to **CSV files**, which **reduced manual effort by 40%**.
- Improved testing processes** to **decrease system errors by 25%**, boost **application reliability**, and ensure smooth **transitions between development and QA phases**.
- Delivered **strategic insights** that helped the team **exceed project milestones**, resulting in a **10% increase in overall efficiency** and a **15% reduction in project delivery timelines**.

Education

Ramrao Adik Institute of Technology (RAIT)

Mumbai, India

Bachelor of Engineering - Computer Engineering

08/2017- 05/2022

Key Achievements

- | | | |
|---|--|--|
| ☆ Client Satisfaction and Project Efficiency
Successfully led a key project that resulted in enhanced system performance and significant improvements in client satisfaction and team productivity. | ☆ Boosted System Performance
Enhanced system performance by 30% through designing micro frontend architecture. | ☆ Increased User Satisfaction
Improved user satisfaction by 40% through optimized UI collaboration with the UX team. |
|---|--|--|

Production Systems & Projects

[V-Rivals – Live Competitive Valorant Tournament Platform](#)

Built a full-stack Esports tournament management platform using **Next.js 15, React, Appwrite, Tailwind CSS, REST APIs, and real-time subscriptions**. Implemented **tournament bracket engines** (single/double elimination), **map veto systems**, automated match lotteries, and **player profile analytics**. Integrated **Discord bots/webhooks** for live notifications, role automation, and community coordination. Developed a secure **admin dashboard**, role-based access control, and real-time monitoring for tournaments, teams, and player statistics.

ADDITIONAL INFORMATION

- Proficient in **professional software engineering practices**, including **version control**, **peer code reviews**, **continuous integration**, and **Agile methodologies**. Skilled in designing and implementing **scalable, modular architectures** for complex applications. Highly capable of translating **client requirements** and **design mock-ups** into **responsive, user-centric web applications**.
- Experienced in leading cross-functional teams and collaborating effectively with **DevOps, backend** and **UX teams** to ensure timely and efficient project delivery. Adept at integrating secure authentication systems, optimizing **API communication** and implementing **robust data security measures**.
- Passionate about leveraging **AI, machine learning, automation** and emerging technologies like **3D modelling** to create innovative, engaging user experiences. Continuously learning to deliver advanced solutions in fast-paced environments.
